To Whom It May Concern,

EHM Engineers has worked with Petersen Brothers Construction since 1975. Records show that EHM Engineers have worked with Petersen Construction and Petersen Brothers Construction on more than 260 new or renovated buildings. The buildings have included residential, agricultural, commercial, industrial and retail buildings of various size and complexity. Many of the building exceeded one million dollars in cost.

Petersen Brothers have an excellent record of completing a building on schedule and within budget. They have developed an ability to help owners find the building type and design that meets their needs and budget.

I would recommend that Petersen Brothers Construction be considered for buildings of all types of construction and the full complement of uses and sizes. Owners will find that Petersen brothers will deliver quality and value.
